March 22, 2020

We are currently digging and splitting bareroot perennials for our spring production. We will have available limited quantities of plants each week as we work through crops. All quantities listed will be graded and in our cooler ready for immediate pickup or shipment. The list will be updated as more varieties become available. We soon will be digging Alliums, Carex, Geranium, Hosta, Salvia, Liatris, Acanthus

Bareroot Availability
